Biome Calibration: Predicted vs Actual Designation Rate — Usa
Bubble size ∝ √n_test pixels · Below diagonal = over-prediction · Above = under-prediction
1:1 (perfect calibration)
Unknown
Deserts & Xeric
Mediterranean
Temperate Conifer Forests
Temp. Broadleaf
Temp. Grasslands
Subtropical Coniferous Forests
Observed transition rate — actual PAs (%, test set)
Mean predicted probability — calibrated (%, test set)
